RESTRICTION/ELECTION

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claims 1-5, drawn to a method for recording a boiling curve of liquids.

Group 11, claims 6-20, drawn to a device for carrying out the method.

The inventions listed as Groups 1 and 11 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group 1 is directed to a method for recording a boiling curve of liquids, which is comprised in combination, inter alia, of steps such as: evaporating and subsequently condensing a sample amount of liquid to be analyzed; monitoring a vapor temperature and the evaporated amount of liquid; dosing the sample amount; bringing to a defined temperature level a filling means and a condensate collection chamber; determining volumetrically a condensed volume and determining a distillation residue of the sample amount by weighing; whereas, claim 6 is directed to a device comprising a filling means, a pump, a duct, a sample dish; a distillation apparatus, a condenser, wherein the filling means and the distillation apparatus are made of well heat-conducting material (metal) and a temperature controller connected to a condenser.

Applicants are advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicants traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Virginia Manoharan whose telephone number is 571-272-1450. The examiner can normally be reached on 8-4:30 Monday-Friday.
